SUMMARY

Dynamic web developer from a Civil Engineering background, developed 5+ projects utilizing JavaScript, TypeScript, React.js, and Node.js. Committed to developing scalable and user-centric web applications, driven by a passion for technology and continuous learning. Actively seeking entry-level positions to contribute to innovative projects.

SKILLS

FRONTEND DEVELOPMENT │ React.js • Next.js • Bootstrap • Tailwind CSS • MUI • HTML • CSS

BACKEND DEVELOPMENT │ Nodejs • Express • JWT • MongoDB • O-Auth

OTHERS │ Redux • Context Api • React Query • Deployment • RESTful Apis • AWS • Figma • Agile Development

SOFT SKILLS │ Adaptability • Team work • Problem solving • Debugging • Continuous learning

EXPERIENCE

MERN STACK WEB DEVELOPMENT INTERNSHIP

Entri │ Nov 2023 - Aug 2024

- Developed a Full-Stack E-Commerce Project Using MERN stack.
- Deployed application on Vercel and Render for quick and efficient hosting.
- Set up Role-Based Access Control (RBAC) to manage different user permissions.
- Used Material-UI (MUI),Bootstrap,Tailwind-CSS to design creative and responsive user interfaces.
- Created RESTful APIs with Express.js and Node.js to connect the frontend and backend.
- Built an Admin Dashboard to manage users and perform CRUD operations for product management.
- MongoDB as the database solution for efficient data storage.

PROJECTS

E-COMMERCE WEBSITE (MERN)   *https://github.com/thahsree/clothes-shopping*

- Enhanced new features and enhancements for the application using React.js.
- Built reusable components that improved the code efficiency.
- Integrated payment gateway using Razorpay Api for secure transactions and implemented role-based access for customers and administrators.
- Adjusted database schemas according to the application changes and assessed project requirements using Agile principles.
- RESTful APIs for product CRUD operations, user authentication, and cart management.

LIVE WEATHER WEB-APPLICATION   *https://github.com/thahsree/weatherApp*

- Developed a Live Weather Web-Application using React.js for the frontend and Node.js for the backend.
- Integrated MySQL to store and manage user data efficiently.
- Leveraged the Weatherstack API for live weather updates and OpenStreetMap for real-time location tracking.
- Implemented robust authentication mechanisms using JWT and express-session.
- Utilized React Query for efficient state management and seamless API interaction.

E-COMMERCE WEBSITE (NEXT-JS)   *https://github.com/thahsree/next-js-ecommerce*

- E-commerce application for clothing using Next.js with TypeScript, ensuring scalability and performance.
- Integrated OAuth authentication for seamless account creation using Google and Facebook.
- Designed a responsive and visually appealing interface with Tailwind CSS to enhance user experience.
- Built an Admin Panel for managing CRUD operations on products and user details.
- Enforced server-side rendering (SSR) and optimized API calls to improve performance and SEO.

EDUCATION AND CERTIFICATION

FULL STACK WEB DEVELOPMENT CERTIFICATION   Nov 2023 - Aug 2024
ENTRI

DIPLOMA IN CIVIL ENGINEERING   Jun 2019 - Mar 2022
P.A Polytechnic College ,Mangalore
